Software developer with experience in designing and developing web applications, constantly exploring new technologies to enhance my skills and tackle new challenges. Each project represents an opportunity for continuous professional growth. I seek to contribute to the development of digital projects and drive the success of the company using my technical and personal abilities.

Experience

Universidad Autónoma de Chiapas

Developer

Tapachula, Chis

January – May 2024

- Developed and implemented an Information System for Seminar Management using the PEVN stack (PostgreSQL, Express.js, Vue.js, Node.js).
- Applied business rules and performed tests to ensure system functionality.
- Fully documented the project, using Kanban to organize and monitor progress.

Volcana Agencia Digital

Intern

Tapachula, Chis

January – May 2023

- Managed company websites, creating content and optimizing performance using web technologies and WordPress.
- Contributed to the development of a digital menu system, applying web technologies to enhance user experience.

Hospital General "Dr. Manuel Velasco Suárez"

Intern

Tapachula, Chis

August – December 2022

- Migrated pharmacy and warehouse databases from a .NET system to a new platform in Laravel, improving data management efficiency.
- Maintained and managed the integrated medical-administrative management system (Sigma), developed in Laravel.
